For Print Providers & Brand Owners

Includes free design software

Integrated Web-to-Print solution

PrintShop Web is an easy to use, powerful and open template-based Web-to-Print solution. It allows online modification, ordering and production of repetitive, promotional and personalized documents. PrintShop Web enables print providers and brand owners to effectively manage promotional print flows, streamline customer interaction while combining the benefits of Variable Information (VI) with On-Demand Printing.

A perfect solution for print providers, brand owners and marketing agencies, PrintShop Web enables you to offer users the capability of personalizing a template document for their needs. They can upload an image for local personalization and modify the text based on pre-defined variable fields. Once the document is ready, users validate and pre-flight their print run and initiate the ordering process. With permissions and access rights that can be set per user, PrintShop Web allows companies to adapt the verification process of submitted orders based on their business process.

A complete Web-to-Print solution with workflow integration and automation

Selects a document, supplies data, previews and validates instantly before ordering

Designer
Publishes document templates

Document Designers publish promotional document as templates to PrintShop Web with pre-mapped variable fields and configured printer finishing options.

Clients select a document, integrate their own data, preview and validate and can order at any time, from anywhere.

Print providers automate their workflow and can offer a personalized, corporate branding storefront to their customers.

Offer your customers a truly integrated and personalized storefront for personalized document ordering and template management

Designer → Document design and publication with PrintShop Mail

Designers use their own design application or can work with PrintShop Mail, to create dynamic templates for variable data printing jobs and simply publish them to a PrintShop Web server.

Client → Automated promotional print ordering

From PrintShop Web, customers can view the templates, integrate their own data and order documents to print - anytime, anywhere. From an intuitive and easy-to-use interface, PrintShop Web allows users to order and re-order any promotional document, either static PDFs, or complex, full personalization jobs.

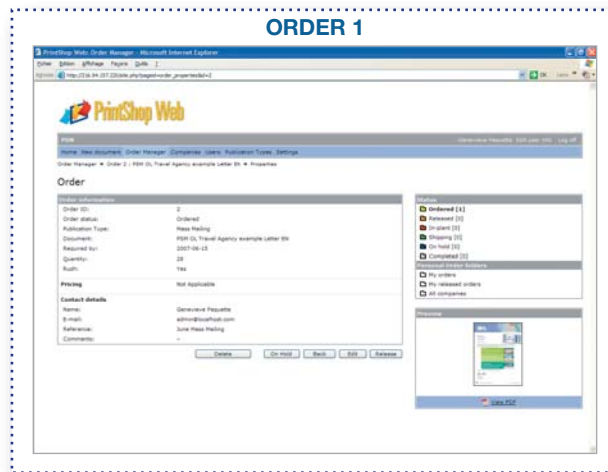

Print Provider → Integrated order management and workflow

PrintShop Web allows print providers to offer their customers the possibility to create personalized documents, submit print jobs and manage the entire process of their orders, from creation to delivery.

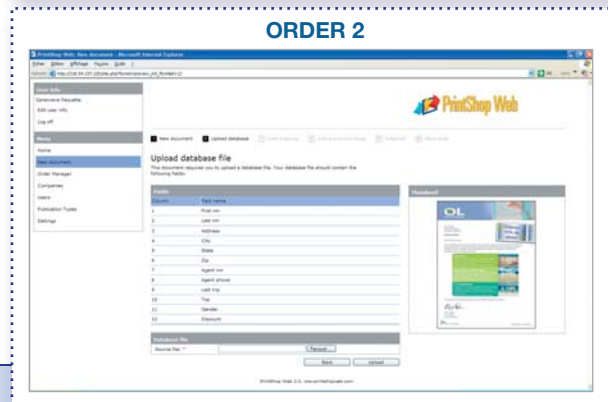

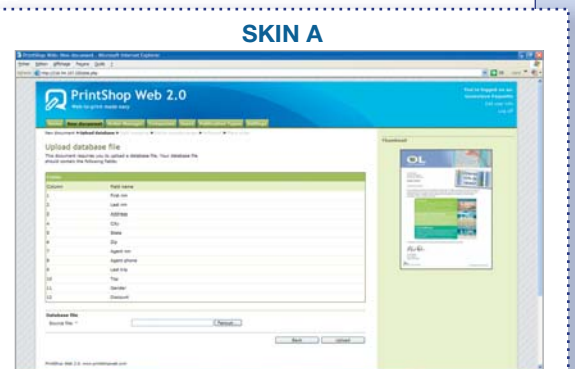

PrintShop Web integrates with any website and can be completely branded and customized

An integrated web-to-print solution providing all the tools you need, from order entry to delivery!

Offer a completely branded and personalized Web portal!

Personalize PrintShop Web to your company's image and those of your customers by creating skins and offer a personalized web interface with company logos and look and feel.
